Non-toxic

Microguard
antimicrobial surface protection 24/7

Start using the latest bio protection technology.

Protecting all our activity and learning environment, 24/7 with a active protective system.

Implemented Microguards antimicrobial surface protection system is quick and easy, focused on always increasing the level of health & safety for our young learners, educators, parents and support staff.

This Australian made non-toxic, eco-friendly, long-lasting, active treatment used in our classrooms and common area (including the AC systems) to kill and keep killing germs, bacteria, viruses and moulds as they are introduced.

Now using a pro-active solution that is protected all surfaces with in our camp, to minimise harmful pathogens from being past between people form surfaces.

Is an Australian-made and owned biotech company, manufacturing in Melbourne, that designs and tailors solutions for the Australian environment. Focused on people, the outcomes required and getting Australian industries back to using sustainable, long-lasting, non-toxic and non-casiogenic products.

Raising the hygiene levels across our School camps

- Ensuring a safe place for our student to learn and grow.
- Being proactive against mould and harmful pathogens.
- Giving confidence to your families and our staff.

Increasing our effort in protection

- Fully decontaminate & disinfect hard-to-reach spaces from germs and mould (including air-conditioning systems).
- Destroys current and newly introduced germs, bacteria & moulds.
- Reduces the risk of surface infection transmission and growth.
- Long-lasting treatment for - hard & soft surfaces.

Working with Microguard.

Increasing hygiene, clients' enjoyment and the ease of maintaining in our school camps.

Products we're starting with - see the Discovery product guide.

1. Area room deep clean treatment applicator

Anti-mould, bacteria (smells) and Germs To be used in all cabins, glamping tents, amenities blocks, en-suites and reception areas.

Please see the Grow Module for how to use and what PPE is required.

2. Cleaner disinfectant (Hospital grade) Anti-mould

Removes and stops regrowth of mould on walls, ceiling and in showers ensuring everything is clean when guests arrive.

3. Outdoor anti-mould spray

To be used on back of cabins, amendie block walls, glamping tents, pathways etc.

Easy spray on treatment
