

Camp & Adventure Accreditation

Specifically designed by industry, for industry

Developed with the Australian Camps Association, the **Camp & Adventure Accreditation** program is designed to ensure that residential camps, outdoor led experiences, and adventure activities can be conducted in a manner where the safety of participants and staff is assured.

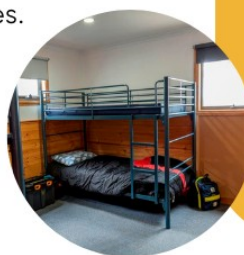

This program ensures that businesses have clear procedures in place for supervising campers, administering bookings, and proper planning has been done to manage emergencies should they arise.

The variety of residential camps and outdoor experiences ensures that different groups – large or small, children or adult, school, special interest, community – can enjoy diverse experiences. This program recognises this diversity and ensures that regardless of the type of experience, the safety of campers and visitors remains paramount.

Camp and Adventure Standards

Businesses must demonstrate their ongoing commitment to conducting camps and outdoor experiences in a safe manner, and provide evidence of:

- Compliance with business and industry specific regulations.
- Adherence to industry sector standards and codes of practice.
- Risk Management procedures and training.
- Business and Marketing Plans.
- Human Resource Management policies and procedures.
- Specialised Activity policies and procedures.
- Child Protection Policies
- Customer Service policy and procedures.
- Environmental management policies and procedures.
- Vehicle operations policies and procedures.
